

JAM pedals Fuzz Phrase

Again, one of my favourite sounding fuzz pedals. The Fuzz Phrase feature a matched pair of the OC44 germanium transistors. Of all the germanium fuzzes I've tried, this is definitely the most dynamic one. Roll down the guitar volume for a cleaner tone and it still maintains its character and tone. Set it to full blown fuzz on a hot tube amp and you'll get tones right up there in the Big Muff territory. Like the red London Fuzz, the Fuzz Phrase also has a bit more gain and lower end than most other germaniums.

Power: 9V battery and adapter (positive!)

Gilmour tones: ASoS – Meddle

Smaller amps/bedroom level: 7/10

Gilmourish.com score: 10/10
