

Delay Llama+

The Delay Llama+ is a tone machine that will become an indispensable part of your sound adding warmth and depth through organic repeats which seamlessly integrate into your playing, courtesy of its BBD chips, faithful reproductions of the Panasonic MN3205.

Its straight forward traditional 3-knob layout is addressed to delay users who are looking to elegantly enhance their hard-earned tone, similarly to how a tape-echo machine would.

In addition to the standard Delay Llama, the Delay Llama+ has a Hold Footswitch and Delay Time Expression input that will spark the imagination of even the bravest of sound explorers!

The Delay Llama+ can also be used with bass guitars.

CONTROLS

1. **LEVEL** controls the depth of the repeats on top of your dry signal
2. **TIME** sets the delay time
3. **REPEATS** sets the amount of repeats
4. Left Footswitch engages the **HOLD** function. Keep this switch pressed down to hear your repeats gradually morph into an infinite oscillation loop! Release the switch and the number of the repeats is right back to where the repeats-knob is set at.
5. Internal trimmer (blue rectangular trimmer) sets the amount of maximum repeats. Turn clockwise to increase the amount of repeats.

EXPRESSION PEDAL INPUT

EXP adjusts the delay time of the repeats.

Only our EXP2 expression pedal will provide ensured operation and full sweep.

"The coolest Delay ever?"

GUITARIST magazine

"The Delay Llama+ is just great! So cool to actually have a "real" analog delay where it does some more unexpected, out of control things... This is cool!"

Bill Frisell

"You've created a very special line of products here having only sampled a few of them I can say they are made with integrity and deliver the full sonic spectrum. The Delay Llama+ with infinite hold gives you just that, limitless possibilities and when paired with the the expression pedal you can really create some atmospheric sonics. Keep doing what you are doing!"

Daniel Lanois

"The quality of the delays in Delay Llama+ are beautiful and warm!"

John Abercrombie

"Delay Llama+ just sounds incredible! It's probably the best sounding delay pedal, I've ever used. The HOLD switch is really cool!"

Kenny Wayne Shepherd
