

# RETROVIBE

Step on the 60s and  
define tomorrow!

JAMPEDALS.COM

## RetroVibe

Comprised of photocells, a bulb, original NOS 2SC828 transistors and carbon comp resistors, the RetroVibe delivers the majestic sounds of the best Uni-Vibe pedals from back in the day, but housed in a modern pedalboard-friendly enclosure and featuring standard 9V DC operation internally lifted to 15V DC.

Choose between the Vibrato and Chorus settings and navigate from slow-rate wavy sounds all the way to fast Leslie-speaker effects!

Use it with any common passive 10k Expression pedal in conjunction with a standard TRS cable for real-time Speed control.

An added twist! We have incorporated an internal trimmer that affects the maximum intensity of the effect, but also dramatically manipulates the sound of the RetroVibe all the while maintaining the pedal's true vintage character.

Roses are red violets are blue  
the RetroVibe's purple and  
you'll looove it too!

### CONTROLS

- DEPTH sets the effect amount in the dry signal
- SPEED sets the rate of the modulation
- Toggle-switch selects Chorus (C) and Vibrato (V) modes
- Internal trimmer sets the maximum intensity of the effect

### EXPRESSION PEDAL INPUTS

- Expression pedal input for remote Speed control

### SPECIFICATIONS

- True Bypass
- Works with 9V DC adaptor (tip-negative)
- Power consumption: 150 mA (max)
- Dimensions (jacks, pots etc. included):  
12 x 9.5 x 3.4 cm / 4.7 x 3.7 x 1.3 inches
- Weight: 350g / 0.77 lbs
