

Lucydreamer Supreme

A Dream Supreme

Lucydreamer Supreme

The Lucydreamer Supreme is our flagship 3-in-1 OD/Volume/Boost pedal, featuring the Lucydreamer Dry/Wet overdrive and a Boost voiced to sound great both as a stand-alone pedal and when pushing the Lucydreamer side! It was created with today's guitar masters' needs and wants in mind, minimizing pedalboard real estate requirements by combining the functionality of 3 pedals in one enclosure.

The Lucydreamer side can track every little nuance of your playing with a wide Gain-Stage spectrum, ranging from highly dynamic tube-amp-like break-up, all the way to full-bodied High-Gain saturation (engaging the high-gain-stage toggle), while effortlessly maintaining chord-voicing clarity!

Set the ratio of your Clean (Dry) to Overdriven (Wet) signal with the M (mix) knob, or creatively manipulate it real-time with the dedicated expression pedal input!

Assign the Boost to the "pre" position via the dedicated toggle-switch to hit the front end of the Overdrive, to get more gain saturation and while in the "post" position, use an expression pedal to control the Boost (B) level. You effectively now have a Volume pedal! (make sure you leave the internal trimmer for the Boost level to its minimum position which is how it ships from our bench).

Incorporating the Lucydreamer Supreme in your signal chain will grant you unprecedented creative control and refined tonal sculpting that will continuously reinvent your Overdrive tone!

CONTROLS

1. LEVEL controls only the Overdrive's output level
2. TONE adjusts the Overdrive's tone
3. GAIN sets the Overdrive's gain level
4. M sets the mix between the clean and overdriven signal
5. B sets the level of the Boost circuit
6. Right footswitch engages the Overdrive side
7. Left footswitch engages the Boost side
8. Middle 2-way toggle-switch selects between low (-) and high (+) gain-stages
9. "↔" 2-way toggle-switch places the Boost before the Overdrive or after the Overdrive
10. Internal trimmer determines the minimum Boost level

*setting the trimmer to the minimum value (default position), allows you to use the Boost as a master volume control with an Expression pedal

EXPRESSION PEDALS

We incorporated a couple of expression inputs that grant maximum creative control and versatility.

1. The EXP MIX expression in, allows you to regulate the ratio between your clean and over-driven signal. The Mix knob determines the maximum travel of the Expression pedal.
2. The EXP BOOST expression IN allows you to determine the amount of Boost / Cut you wish to apply. The Boost potentiometer on the pedal sets the maximum level up to which the Expression pedal will travel.

*we recommend our EXP1 expression pedal for ensured compatibility

SPECIFICATIONS

1. True Bypass
2. Works with a 9V battery or 9V DC adaptor (tip-negative)
3. Power consumption: 12 mA
4. Dimensions (jacks, pots etc. included): 13 x 10 x 5.1 cm / 5.1 x 3.9 x 2 inches
5. Weight: 400g / 0.89 lbs.

"There's a ton of versatility here, and every sound is killer."

Guitar Player Magazine

"The LucyDreamer Supreme is an excellent sounding overdrive/distortion, with really cool options re: volume boost!"
