

RATTLER

**Rattle your
audience
off their feet!**

JAMPEDALS.COM

Rattler

JAM pedals' unabashed distortion monster.

We pulled out all the stops to make sure the Rattler will get you all the amazing tones of great early 80s ProCo RAT® distortion boxes and put in the time and R&D to make it more responsive to picking and fretting nuances resulting in an open, dynamic, overdriven tube-amp feel!

Its asymmetrical clipping circuit, carbon comp resistors and of course the legendary NOS LM308N chip, the featured star of this design, are the main ingredients of a great recipe resulting in the Rattler shining through any rig, whether modern or vintage.

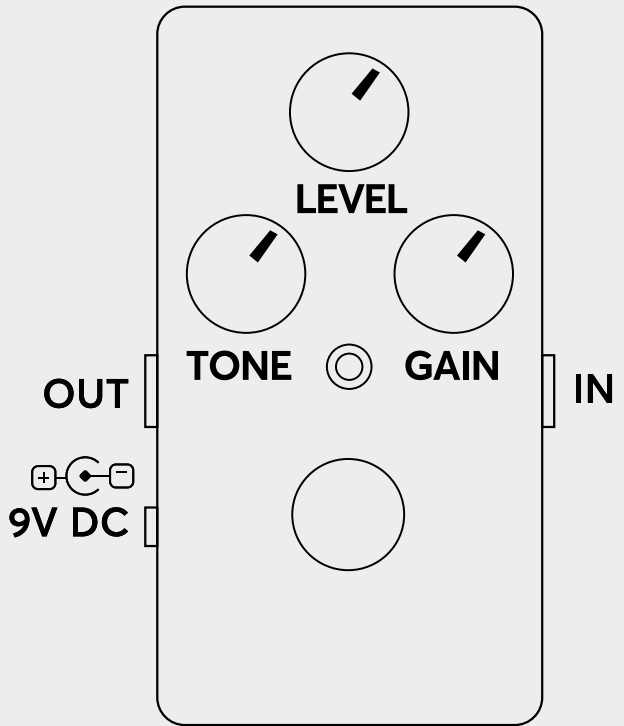

Enjoy fat and creamy distortion courtesy of the devious snake!

CONTROLS

1. **LEVEL** controls the output level
2. **TONE** adjusts the tone
3. **GAIN** sets the gain level

SPECIFICATIONS

1. True Bypass
2. Works with a 9V battery or 9V DC adaptor (tip-negative)
3. Power consumption: 5 mA
4. Dimensions (jacks, pots etc. included): 11.1 x 7 x 4.8 cm / 4.3 x 2.7 x 1.8 inches
5. Weight: 230g / 0.5 lbs.

"I am particularly fond of the Rattler, as I have been on the prowl for toneful yet high-gain distortion. There are plenty of fuzzboxes out there these days (and JAM has some good ones, too) but few distortion boxes. The Rattler has that fat, creamy sound/sustain yet doesn't have to be turned up all the way step out when full-on raging is required!"

Nels Cline

"Its wide range of harmonically-rich distortion tones, combined with dynamic responsiveness, make it a great asset for anyone's pedalboard."

GUITARIST magazine

"Where this pedal really stands out is in its amp-like responsiveness and superlative tone. The Rattler doesn't have a bad sound in it"
