

RIPPLY FALL

Immerse yourself in
3-D modulation!

JAMPEDALS.COM

Ripply Fall Bass

Prepare to be immersed in 100% analog, multi-modulation bliss!

After years of recommending the WaterFall and the Ripple as a great combination, we set out to offer these two pedals, housed side-by-side in a single enclosure, with the introduction of the following unique features:

- The middle footswitch triples the at-any-given-point WaterFall Speed, generating sounds ranging all the way from Leslie speaker simulation, to ring modulator effects and up to deranged warble!
- Expression pedal inputs for sculpting the WaterFall's Depth and Speed in real-time.

WaterFall

A smooth, lush-sounding Chorus / Vibrato pedal, featuring BBD chips, with 2 toggle-switches, one to select between chorus and vibrato modes, and another to switch to a "wetter" effect.

Ripple

Smooth, sweet and transparent 2-stage phaser pedal.

CONTROLS

1. DEPTH controls the WaterFall's depth on top of the Dry signal
2. SPEED (middle) sets the WaterFall's speed
3. SPEED (left) sets the Ripple's Speed
4. Left footswitch engages the Ripple
5. Right footswitch engages the WaterFall
6. Middle footswitch engages the WaterFall speed multiplier
7. "C / V" 2-way toggle-switch selects between the WaterFall's Chorus and Vibrato modes
8. "+ / -" 2-way toggle-switch selects between discrete (-) or more pronounced (+) WaterFall modulation
9. Internal trimmer adjusts the WaterFall's maximum speed

SPECIFICATIONS

1. True Bypass
2. Works with 9V DC adaptor (tip-negative)
3. Power consumption: 26 mA
4. Dimensions (jacks, pots etc. included): 13 x 10 x 5.1 cm / 5.1 x 3.9 x 2 inches
5. Weight: 430g / 0.95 lbs.
