

# Octaurus Ltd.

As you hold the Octaurus Ltd in your hands, you're holding more than just another octafuzz – you're gripping both a conduit to unbridled power, and an all-access pass to sounds and ideas yet unclaimed.

With its unmistakable vintage personality, it has been meticulously crafted to combine all the behavioural attributes of legendary predecessors in a single standalone device.

With an intricate turret-based point-to-point construction, the Octaurus Ltd relies on a batch of early 60s NOS silicon transistors, to deliver its supreme tonal profile.

Its layout is straight-forward and intuitive with a highly responsive set of controls for your standard volume, tone and gain pots.

There are also 2 toggle-switches:

- the left one alternates between a mid-scooped voicing (more industrial fuzz feel, suitable for tight riffing and a more pronounced octave effect) and a full range voicing (suitable for harmonically rich lead lines).
- the right one allows you to select symmetrical or asymmetrical clipping for different flavours of tightness, feel and definition.

**It is a tour de force of vintage sound and feel.**

# OCTAURUS

**Lead the Sonic Stampede!**

## CONTROLS

1. Level sets the output level
2. Tone adjusts the tone response
3. Gain sets the gain level
4. Left toggle-switch: ↑ for scooped and ↓ for full voicings
5. Right toggle-switch: ↑ for asymmetrical and ↓ for symmetrical clipping modes

## SPECIFICATIONS

1. True Bypass
2. Works with 9V battery or 9V DC adaptor (tip-negative)
3. Power consumption: 5 mA
4. Dimensions (jacks, pots etc.included):  
7.5 x 12 x 5.6 cm / 2.9 x 4.7 x 2.2 inches
5. Weight: 265 / 0.6 lbs.
