Octaurus NOS

The Octaurus NOS takes everything we love about the Octaurus and adds a little extra magic.

Featuring the same rare batch of early 60s NOS silicon transistors its limited predecessor did, this version offers a tonal character that's as authentic as it gets. If you're chasing vintage octafuzz with unmatched warmth and responsiveness, this is the one. Stomp on the Bull, and he will stomp you back!

With its simple and intuitive layout, the Octaurus NOS is designed to bring powerful fuzz tones to your fingertips, whether you're riffing hard or carving out rich, expressive leads.

Two toggle switches expand its versatility:

- The left toggle switch alternates between a mid-scooped voicing (perfect for tight, focused riffing and a more pronounced octave effect) and a full-range voicing (ideal for harmonically rich solos).
- The right toggle switch selects between symmetrical and asymmetrical clipping, letting you fine-tune the feel, tightness, and dynamics.

The Octaurus NOS is more than just a fuzz pedal – it's a piece of history, handmade to celebrate the golden era of tone.

CONTROLS

1. Level: Adjusts the output level.
2. Tone: Shapes the tonal character.
3. Gain: Controls the amount of gain.
4. Left toggle switch: ↑ for scooped and ↓ for full voicings.
5. Right toggle switch: ↑ for asymmetrical and ↓ for symmetrical clipping modes.

SPECIFICATIONS

1. True Bypass
2. Works with 9V battery or 9V DC adaptor (tip-negative)
3. Power consumption: 5 mA
4. Dimensions (jacks, pots etc. included): 7.5 x 12 x 5.6 cm / 2.9 x 4.7 x 2.2 inches
5. Weight: 265 / 0.6 lbs.
